ABOUT ME

MERN Stack Developer skilled in MongoDB, Express.js, React.js, Node.js, and MySQL Workbench. Experienced in building responsive web apps, writing clean code, and working in agile teams. Eager to contribute to innovative, growth-driven projects.

WORK EXPERIENCE

Associate Software Engineer Lahore, Pakistan

Solutyics

05/09/2024 – Current

Responsibilities as a MERN Stack Developer

- Develop and maintain full-stack web applications using **MongoDB, Express.js, React.js, MySQL and Node.js**.
- Build **responsive and user-friendly UIs** using modern React features (Hooks, Redux Tool kit , etc.).
- Design and implement **RESTful APIs** and ensure seamless frontend-backend integration
- Work with **databases like MongoDB and MySQL**, handling CRUD operations and schema design
- Implement **authentication and authorization** (JWT, OAuth) for secure user access
- Use **Git** for version control and collaborate with teams
- Deploy applications to **cloud platforms or hosting services** (e.g., Namecheap, Vercel, Render).

EDUCATION AND TRAINING

2021 – 2024 Lahore , Pakistan

ASSOCIATE DEGREE IN COMPUTER SCIENCE Superior University Lahore

PROJECTS

Biztyics – Business Registration Platform

Tech Stack: React, Vite, Express.js, Node.js, MongoDB, Namecheap

Developed and deployed a full-stack platform for business registration featuring admin login, role-based permissions, and seamless workflows. Built with React and Express.js, and deployed on Namecheap with a custom domain. Focused on clean architecture, authentication, and end-to-end deployment.

Accounts Management Software (Ongoing)

Full-Stack Developer | Node.js, Express.js, MySQL Workbench, Redux Toolkit

Building a custom accounting system for small businesses with features like sales overview, invoicing, customer/product management, receivables, payables, and tax handling. Backend built with Node/Express; Redux Toolkit used for efficient frontend state management. Focused on clean architecture and role-based access.

AI-Powered CV Creation Platform

Frontend Contributor | React, Context API

Collaborated on a CV-building platform that allows users to create CVs, upload for feedback, generate cover letters, and receive AI-based interview questions. Worked on **frontend enhancements, bug fixing, and feature completion** using React and Context API. Backend built in Python with ML capabilities, developed by a separate backend team.

SKILLS

React | Node.js | Docker | Git | MongoDB | MySQL | Tailwind | Azure | CI/CD | Jenkins | Kubernetes | Express
